

## NAVIGATION SAFETY POLICY

The Company recognises that ensuring safety in navigation is of paramount importance to our business activities. Our aim is to provide safe and secure offshore support services. With these responsibilities in mind, the Company has developed a Navigation Safety Policy designed to manage, control and, where possible, reduce the impact of our activities. This Navigation Safety Policy is an integral part of the day-to-day management of the organisation. Where there is any doubt, the Company Stop Work Policy should be abided by.

The navigation safety policy is based on the below points:

- All Senior Management, employees and other associated personnel shall be committed to promoting safe maritime navigation activities, giving a high priority to safety
- We shall adhere to all maritime related laws and company policies, procedures and work instructions so as to achieve a high level of compliance
- We shall constantly review and, where appropriate, improve our vessels' safety management systems and strive constantly to improve our vessel safety standards
- We shall ensure all masters and crew possess certification appropriate to the duties they are expected to carry out and their certifications are current and up to date.
